Metadata Standards for the Digital Preservation of Cultural Objects

Project backgrounds:
- One of key research areas of standard Systems and Key Standards for Digital Preservation of Cultural Objects which is funded by Ministry of Science and Technology of China in 2014.
- To promote integration, sharing and application of digital collections of cultural objects in China by establishing an uniform metadata standards for digital preservation of cultural objects.
- A cooperative project by seven institutions that come from academic libraries, museums and public libraries.

Expected outcomes:
- The metadata framework for the digital preservation of cultural objects.
- Classification systems for both digitized and physical cultural objects.
- Descriptive, administrative and preservative metadata standards for cultural objects.
- Other supporting specifications for application of the above metadata standards.
